Summary

My main hard skills are developing Web Applications (full-stack) using multiple tools and language like Laravel, TypeScript, React, Vue/Nuxt, My main soft skills are having great responsibility at work, good at maintaining consistency in any situation, excellent at adapting to any situation and environment, and having great passion in everything I do. Also, I never stop learning, improving myself, and will continue to push my limitations.

Professional Experiences

Incentro APAC / Netherlands Digital Partner Solution (APAC Branch) Indonesia
Software Engineer Internship Aug 2025 – Aug 2026

- Maintained and enhanced the livestreaming platform for padel and racket sports, leveraging Nuxt for the frontend layer, a BFF (Backend for Frontend) architecture, and a Golang-based backend, all integrated within a monorepo structure; utilized Hasura and GraphQL to query data from Drizzle Studio, with Sanity serving as the content management system.
- Maintained the corporate website for incentro.com, built on Next.js and powered by Contentful for page and blog content management.
- Managed and updated the food menu section of skysupply branch website using Nuxt for the frontend and Sanity as the CMS.
- Resolved critical issues on myhiddenimpact.com, including fixes to the survey's math logic module and correcting a Google Translate accessibility bug on pages where translation should have been restricted.
- Implemented end-to-end testing suite for veilig-melden.nl using Playwright, supporting the platform's migration from Vue to Nuxt.

Freelancer Indonesia
Software Developer Feb 2024 – Feb 2026

- Developed a gold store management website featuring multi-level access control and role-based logic for commission/sales distribution among sales staff, built using Laravel.
- Developed a prison inmate belongings deposit system with multi-role access control, implementing filtering logic to determine permitted and restricted items (including food) allowed into the facility, built using Laravel.
- Resolved frontend layout issues on the INBIS (Business Incubator) landing page for Institut Bisnis dan Teknologi Indonesia (INSTIKI), correcting layout inconsistencies using React.
- Fixed frontend layout issues on a women's community survey website for a specific village, resolving layout bugs on the landing page and several other pages using React.

CV Harmoni Permata Indonesia
Front-end Developer Internship Sep 2022 – Nov 2022

- Built an e-commerce web application as a final internship project, using Laravel and Tailwind CSS, with Laravel Breeze as the authentication/starter template.
- Developed a browser-based drink menu poster/display featuring custom styling, built with Tailwind CSS as the primary styling framework.

Blue Lake Indonesia
Mobile Developer Internship Feb 2022 – Apr 2022

- Developed a restaurant application featuring a table queuing/reservation system that displays real-time table availability status (available/occupied), built primarily with Java.
